HOW TO USE THE NEW BINKS CATALOG

You'll find your new BINKS catalog an easy and quick reference for finding the equipment you may need to make your spraying jobs easier and more efficient.

Notice the narrow black panels on the edges of the front cover listing the many groups of equipment which you will find described inside.

As you hold the catalog in your left hand (as illustrated), you will notice that there are many black panels on the inside pages corresponding to those on the front cover.

Place your thumb to the right of the black cover panel which lists the general heading you are looking for. The corresponding black edges of the panels on the inside pages will immediately direct you to that section, and in a few seconds you will find just the item you need.

INDEX

HEAVY DUTY PRODUCTION SPRAY GUNS

BINKS MODEL 18 SPRAY GUN

- **Gun body**, drop forged aluminum, alumilite treated for surface protection.
- **Gun head**, drop forged bronze, heavily plated.
- **Needle valve**, floating type, hardened stainless steel or with tungsten carbide tip*, needle adjustable to compensate for wear.
- **Fluid nozzle**, hardened steel, stainless steel or with tungsten carbide insert.*
- **Air nozzle**, drop forged bronze, heavily plated, self-centering, tapered seat principle.
- **Air valve**, stainless steel, cartridge type.
- **Trigger** has hardened steel plate and bronze bushings to withstand wear.
- **Retainer ring** does not have to hold air. No leakage.
- **Fluid needle** spring self-contained, cannot pop out.
- **Controls** at back of gun.
- **Air passage**, large, reducing pressure loss to minimum.
- **Spray pattern** adjustable from round to fan with all intermediate patterns.
- **Air hose connection**, $\frac{1}{4}$ inch St. P.
- **Fluid hose connection**, $\frac{3}{8}$ inch St. P.

The finest spray gun available anywhere

Model 18 gun
Shpg. Wt. $2\frac{1}{2}$ lbs.

Model 18 gun with Model 81-500
qt. attachable siphon cup
Shpg. Wt. $3\frac{1}{2}$ lbs.

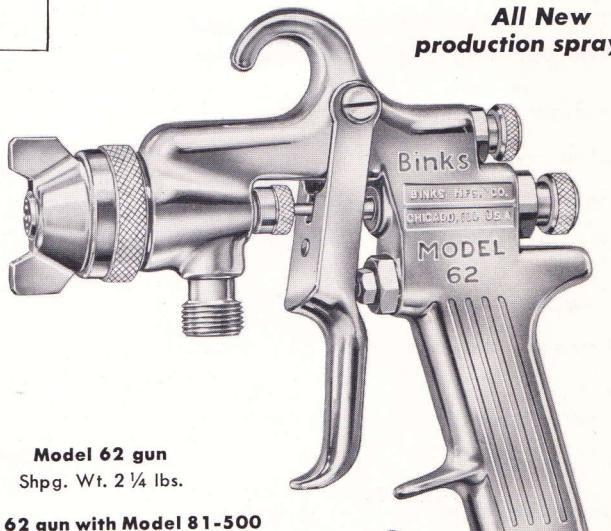

*Model 18V gun equipped with tungsten carbide insert and tip.

When ordering Model 18 gun be
sure to specify air and fluid nozzles
desired. See Nozzle Selection Chart,
pages 13 and 14.

BINKS MODEL 62 SPRAY GUN

- **Gun body**, drop forged aluminum. Plated for surface protection.
- **Gun head**, inserted stainless steel.
- **Needle Valve**, floating type, hardened stainless steel or with tungsten carbide tip*, needle adjustable to compensate for wear.
- **Fluid nozzle**, hardened steel, stainless steel or with tungsten carbide insert.*
- **Air nozzle**, drop forged bronze, heavily plated, self-centering, tapered seat principle.
- **Air valve**, stainless steel, cartridge type.
- **Trigger**, drop forged aluminum. Hardened steel plate to withstand wear.
- **Retainer ring** does not have to hold air. No leakage.
- **Controls** at back of gun.
- **Fluid passage** is all stainless steel.
- **Air passage** extra large, reducing pressure loss to minimum.
- **Spray pattern** adjustable from round to fan with all intermediate patterns.
- **Air hose connection**, $\frac{1}{4}$ inch St. P.
- **Fluid hose connection**, $\frac{3}{8}$ inch St. P.

**All New
production spray gun**

Model 62 gun
Shpg. Wt. $2\frac{1}{4}$ lbs.

Model 62 gun with Model 81-500
qt. attachable siphon cup.
Shpg. Wt. $3\frac{1}{2}$ lbs.

*Model 62V gun equipped with tungsten carbide insert and tip.

When ordering Model 62 gun be
sure to specify air and fluid nozzles
desired. See Nozzle Selection Chart,
pages 13 and 16.

STANDARD PRODUCTION SPRAY GUNS

BINKS MODEL 7 SPRAY GUN

- **Gun body**, drop forged aluminum, alumilite treated for surface protection.
- **Gun head**, drop forged bronze, heavily plated.
- **Needle valve**, floating type, hardened steel, stainless steel or with tungsten carbide tip,* needle adjustable to compensate for wear.
- **Fluid nozzle**, hardened steel, stainless steel, or with tungsten carbide insert.*
- **Air nozzle**, drop forged bronze, heavily plated, self-centering, tapered seat principle.
- **Air valve**, stainless steel cartridge type.
- **Trigger** has hardened steel plate and bronze bushings to withstand wear.
- **Fluid needle** spring self-contained, cannot pop out.
- **Controls** at back of gun.
- **Air passage** large, reducing pressure loss to minimum.
- **Spray pattern** adjustable from round to fan with all intermediate patterns.
- **Air hose connection**, $\frac{1}{4}$ inch St. P.
- **Fluid hose connection**, $\frac{3}{8}$ inch St. P.

Still a favored model by popular demand

A newly designed low cost lightweight gun, incorporating heavy-duty features.

- **Gun body**, aluminum.
- **Fluid passage**, brass.
- **Needle valve**, hardened steel or stainless steel, needle adjustable to compensate for wear.
- **Air nozzle**, drop forged bronze.
- **Fluid nozzle**, hardened steel or stainless steel.
- **Air valve**, cartridge type.
- **Fluid control** at back of gun.
- **Retainer ring** does not have to hold air. No leakage.
- **Spray pattern** adjustable from round to fan with all intermediate patterns.
- **Air hose connection**, $\frac{1}{4}$ inch St. P.
- **Fluid hose connection**, $\frac{3}{8}$ inch St. P.

BINKS MODEL 29 SPRAY GUN

TOUCH-UP SPRAY GUNS

BINKS MODEL 26 SPRAY GUN

Model 26 gun
Shpg. Wt. 2 lbs.

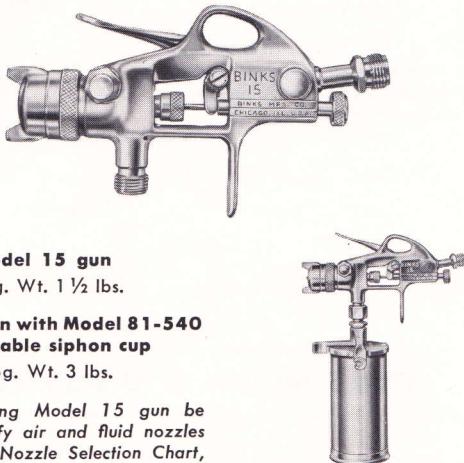

Model 26 gun with Model 81-500 qt. attachable siphon cup
Shpg. Wt. 3 lbs.

When ordering Model 26 gun be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 18.

A small, lightweight production gun well suited to women operators. Excellent for touch-up work.

- **Gun body**, aluminum.
- **Fluid passage**, brass.
- **Needle valve**, hardened steel or stainless steel, needle adjustable to compensate for wear.
- **Air nozzle**, drop forged bronze.
- **Fluid nozzle**, hardened steel or stainless steel.
- **Air valve**, cartridge type.
- **Fluid control** at back of gun.
- **Retainer ring** does not have to hold air. No leakage.
- **Spray pattern** adjustable from round to fan with all intermediate patterns.
- **Air hose connection**, $\frac{1}{4}$ inch St. P.
- **Fluid hose connection**, $\frac{3}{8}$ inch St. P.

BINKS MODEL 15 SPRAY GUN

Model 15 gun
Shpg. Wt. 1 $\frac{1}{2}$ lbs.

Model 15 gun with Model 81-540 8 oz. attachable siphon cup
Shpg. Wt. 3 lbs.

When ordering Model 15 gun be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 18.

Lightweight gun with convenient overhead trigger for touch-up and shading.

- **Gun body**, one piece, aluminum. Plated for surface protection.
- **Gun head**, inserted drop forged bronze.
- **Needle valve**, hardened steel or stainless steel, needle adjustable to compensate for wear.
- **Air nozzle**, bronze, self-centering, tapered seat principle.
- **Retainer ring** does not have to hold air. No leakage.
- **Fluid nozzle**, hardened steel or stainless steel.
- **Overhead trigger**, curved to fit index finger. Gentle pressure operates it.
- **Fluid control** at back of gun.
- **Spray pattern** adjustable from round to fan with all intermediate patterns.
- **Air and fluid connections**, $\frac{1}{4}$ inch St. P.

BINKS TOUCH-UP OUTFITS

6-41 Touch-Up Outfit with six metal cups

6-42 Touch-Up Outfit with six glass jars

Shpg. Wt. 10 lbs.

Complete touch-up and shading outfits.

Used in paint and refinishing shops for light spray work, shading and retouching in various colors. Cups and jars are provided with seal-tight covers, eliminating the necessity for mixing colors frequently.

Model 6-41 Consists of

- 1—Model 15 Gun
- 1—81-540 Siphon Cup
- 6—U-444 8 oz. Cups
- 6—U-32 Seal Tight Covers
- 1—U-474 Carrying Rack
- 1—15' Length of H-101 Hose with Connections

Model 6-42 Consists of

- 1—Model 15 Gun
- 1—81-580 Siphon Cup
- 6—81-7 8 oz. Glass Jars
- 6—81-5 Seal Tight Covers
- 1—U-474 Carrying Rack
- 1—15' Length of H-101 Hose with Connections

Binks Manufacturing Company
3114-44 CARROLL AVE., CHICAGO 12 • BRANCHES IN ALL PRINCIPAL CITIES

HEAVY FLUIDS SPRAY GUNS

BINKS MODEL 7E2 SPRAY GUN

Heavy duty production spray gun for applying asphalt compounds and other heavy fluids.

- Basically the same as Model 7 gun (see page 2) but with larger head.
- **Four-finger trigger.**
- For use with pressure tank or fluid pump only.
- **Air hose connection, $\frac{3}{8}$ inch St. P.**
- **Fluid hose connection, $\frac{3}{4}$ inch St. P.**

Model 7E2 gun

Shpg. Wt. 3 $\frac{1}{4}$ lbs.

When ordering Model 7E2 gun be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 19.

BINKS MODEL 18D SPRAY GUN

Heavy duty production spray gun for applying medium heavy fluids.

- Basically the same as Model 18 gun (see page 1) but with larger head.
- For use with pressure tank or fluid pump only.
- **Air hose connection, $\frac{1}{4}$ inch St. P.**
- **Fluid hose connection, $\frac{1}{2}$ inch St. P.**

Model 18D gun

Shpg. Wt. 3 lbs.

When ordering Model 18D gun be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 19.

LIGHTWEIGHT SPRAY GUNS

A low cost internal atomizing pressure feed gun.

- **Gun and cup cover**, one-piece nickelplated aluminum construction.
- **Bleeder type gun**—no air valve.
- Cup is seamless aluminum, one-quart capacity, screw-type.
- **Fan spray nozzle** supplied with gun. Round spray and slotted angle nozzles available.
- **Can be converted** to pressure tank use without special tools. See parts sheet 1206 for instructions.
- **For use with compressors** as small as $\frac{1}{4}$ H.P. or from regulated air lines where the pressure does not exceed 40 lbs.
- **Air hose connection, $\frac{1}{4}$ inch St. P.**
- **Fluid hose connection, $\frac{3}{8}$ inch St. P.**

BINKS MODEL 8 SPRAY GUN

Model 8 gun

Shpg. Wt. 2 lbs.

- **Fan Spray Nozzle**—Order R-131-R8 (1.9 C.F.M. at 50 lbs.)
- **Round Spray Nozzle**—Order R-131-R9 (1.3 C.F.M. at 50 lbs.)
- **Slotted Angle Nozzle**—Order R-131-R10 45° angle for floor and ceiling spraying. (1.3 C.F.M. at 50 lbs.)

AUTOMATIC SPRAY GUNS

BINKS MODEL 21 SPRAY GUN

Model 21 gun
Shpg. Wt. 3 lbs.

*Model 21V gun equipped with tungsten carbide insert and tip.
When ordering Model 21 gun be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 20.

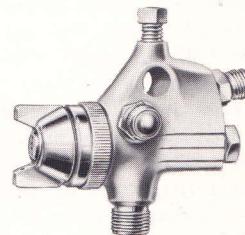

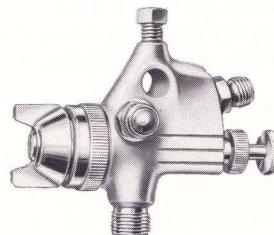

Heavy duty pneumatically operated spray gun.

- **Gun body**, drop forged bronze, heavily plated.
- **Needle valve**, hardened stainless steel or with tungsten carbide tip*, needle adjustable to compensate for wear.
- **Fluid nozzle**, hardened steel, stainless steel or with tungsten carbide insert.*
- **Air nozzle**, drop forged bronze, heavily plated, self-centering, tapered seat principle.
- **Retainer ring**, does not have to hold air. No leakage.
- **Air passage**, large, reducing pressure loss to minimum.
- **Spray pattern**, adjustable from round to fan with all intermediate patterns.
- **Gun shut on and off by 3-way valve**. (See illustrations, lower part of page.) Air turned on before fluid, eliminating spitting or dripping. Fluid turned off before air.
- **Speed**: As high as 250 operations per minute.
- **Atomizing air connection**, $\frac{1}{4}$ inch St. P.
- **Fluid connection**, $\frac{3}{8}$ inch St. P.
- **Cylinder air connection**, $\frac{1}{4}$ inch St. P.
- **Mounting hole**, $\frac{1}{2}$ inch diameter.

BINKS MODELS 21A AND 21B SPRAY GUNS

Both models for continuous operation with automatic handling device.

- **Flow of air through guns** should be controlled by cam or manually operated valves.
- **Spray pattern**, adjustable from round to fan with all intermediate patterns.
- **Model 21A has a needle valve** which is always open. If pressed gently, this valve will clear particles from the fluid nozzle.
- **Model 21B has no needle valve**.
- **Models 21AV and 21BV fluid nozzles** equipped with tungsten carbide insert and tip.
- **Atomizing air connections**, $\frac{1}{4}$ inch St. P.
- **Fluid connections**, $\frac{3}{8}$ inch St. P.
- **Mounting holes**, $\frac{1}{2}$ inch diameter.

Model 21A
Shpg. Wt. 2 lbs.

Model 21B
Shpg. Wt. 2 lbs.

When ordering Model 21A or Model 21B guns be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 20.

BINKS MODEL 21 GUN ACCESSORIES

Cam control
Shpg. Wt. 2 lbs.

Hand control
Shpg. Wt. 4 lbs.

Foot control
Shpg. Wt. 4 lbs.

No. of guns	CAM	HAND	FOOT
1	NG-350	NG-467	NG-475
2	NG-460	NG-468	NG-476
3	NG-461	NG-469	NG-477
4	NG-462	NG-470	NG-478
5	NG-463	NG-471	NG-479
6	NG-464	NG-472	NG-480
7	NG-465	NG-473	NG-481
8	NG-466	NG-474	NG-482

→ HOW TO USE THIS CHART: Determine the number of guns to be controlled and find that number under "No. of guns." Read across to the NG-series number under the name of the control you choose. For example, six guns can be cam-controlled by NG-464.

See next page for other accessories.

Binks Manufacturing Company

Catalog Page

AUTOMATIC SPRAY GUNS

- **NG-380 bracket**, designed for use with spray gun models 21, 21A and 21B.

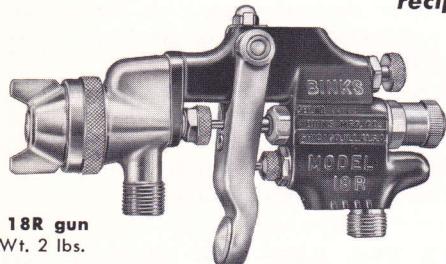

Makes it possible to adjust gun to any desired position.

Bracket arm 18 inches long. Opening in bracket clamp one inch in diameter.

- **NG-387 valve**, three-way slide valve for operating model 21 gun.

BINKS MODEL 18R SPRAY GUN

Heavy duty automatic spray guns, mechanically operated. Primarily for use with Binks automatic reciprocating machines.

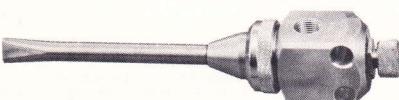

Model 18R gun
Shpg. Wt. 2 lbs.

- **Gun body**, drop forged aluminum, alumilite treated for surface protection.
- **Gun head**, drop forged bronze, heavily plated.
- **Needle valve**, floating type, hardened stainless steel or with tungsten carbide tip*, needle adjustable to compensate for wear.
- **Fluid nozzle**, hardened steel, stainless steel or with tungsten carbide insert.*
- **Air nozzle**, drop forged bronze, heavily plated, self-centering, tapered seat principle.
- **Air valve**, stainless steel, cartridge type.
- **Trigger**, mechanically operated. Has hardened steel button and plate and bronze bushings to withstand wear.
- **Retainer ring** does not have to hold air. No leakage.
- **Fluid needle spring**, self-contained, cannot pop out.
- **Air passage**, large, reducing pressure loss to minimum.
- **Spray pattern**, adjustable from round to fan with all intermediate patterns.
- **Air hose connection**, $\frac{3}{8}$ inch St. P.
- **Fluid hose connection**, $\frac{3}{8}$ inch St. P.

*Model 18RV gun equipped with tungsten carbide insert and tip.
When ordering Model 18R gun be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 14.

BINKS MODEL 162 GEAR SPRAY GUN

Model 162 gun
Shpg. Wt. 3 lbs.

■ Model 162 gear spray gun with adjustable needle for controlling amount of fluid. ■ Model 162A gear spray gun without needle valve control. To be used with metering valves.

21 GUN ACCESSORIES, (Cont'd)

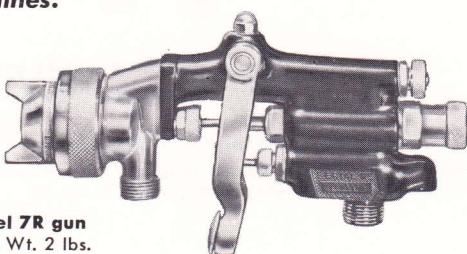

NG-380 adjustable bracket
Shpg. Wt. 5 lbs.

NG-387 three-way slide valve
Shpg. Wt. 2 $\frac{1}{2}$ lbs.

BINKS MODEL 7R SPRAY GUN

Model 7R gun
Shpg. Wt. 2 lbs.

- **Gun body**, drop forged aluminum, alumilite treated for surface protection.
- **Gun head**, drop forged bronze, heavily plated.
- **Needle valve**, floating type, hardened steel, stainless steel or with tungsten carbide tip,* needle adjustable to compensate for wear.
- **Fluid nozzle**, hardened steel, stainless steel or with tungsten carbide insert.*
- **Air nozzle**, drop forged bronze, heavily plated, self-centering, tapered seat principle.
- **Air valve**, stainless steel, cartridge type.
- **Trigger**, mechanically operated. Has hardened steel button and plate and bronze bushings to withstand wear.
- **Fluid needle spring**, self-contained, cannot pop out.
- **Air passage**, large, reducing pressure loss to minimum.
- **Spray pattern**, adjustable from round to fan with all intermediate patterns.
- **Air hose connection**, $\frac{3}{8}$ inch St. P.
- **Fluid hose connection**, $\frac{3}{8}$ inch St. P.

*Model 7RV gun equipped with tungsten carbide insert and tip.
When ordering Model 7R gun be sure to specify air and fluid nozzles desired. See Nozzle Selection Chart, pages 13 and 15.

To lubricate all open or semi-enclosed gears.

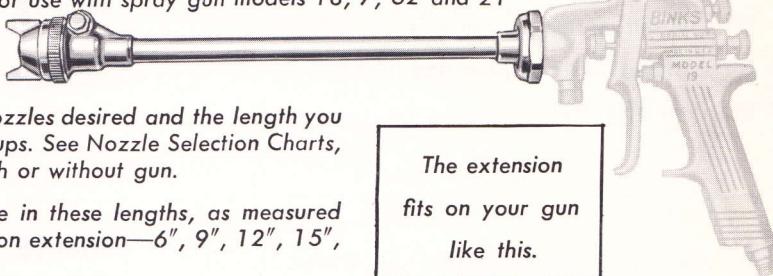

- Mount one or more in permanent position to spray lubricant on the face of gears.
- Operation can be controlled by hand-operated valves, or by solenoid valves operated by hand or time switches.

NOZZLE EXTENSIONS

Ordering Data for Extensions For use with spray gun models 18, 7, 62 and 21

When ordering extensions be sure to specify model of gun and model of extension, air and fluid nozzles desired and the length you wish. Should not be used with siphon paint cups. See Nozzle Selection Charts, pages 13, 19 and 20. Can be ordered with or without gun.

All models shown on this page are available in these lengths, as measured from fluid inlet on gun to tip of fluid nozzle on extension—6", 9", 12", 15", 18", 24", 30", 36", 48", 60", 72", 84".

The extension fits on your gun like this.

BINKS MODEL EAX—STRAIGHT

- To spray surfaces at distance or location not otherwise accessible.
- Spray pattern not adjustable.
- Minimum diameter of opening into which extension can be inserted $\frac{7}{8}$ ".

BINKS MODEL ENX—45° ANGLE

- Use when spray must be at 45° angle.
- Spray pattern not adjustable.
- Spray head may be turned in any direction.
- Minimum diameter of opening into which extension can be inserted $1\frac{3}{4}$ ".

BINKS MODEL EBX—90° ANGLE

- Use when spray must be at 90° angle.
- Spray pattern not adjustable.
- Spray head may be turned in any direction.
- Minimum diameter of opening into which extension can be inserted $1\frac{7}{8}$ ".

BINKS MODEL ERX—30° REVERSE

- Use when object to be sprayed requires reverse angle of spray.
- Spray pattern not adjustable.
- Spray head may be turned in any direction.
- Minimum diameter of opening into which extension can be inserted $1\frac{7}{8}$ ".

BINKS MODEL EA—STRAIGHT

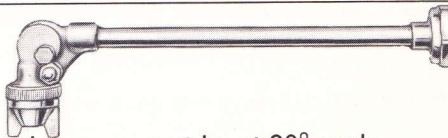

- To spray surfaces at distance or in location not otherwise accessible.
- Spray pattern adjustable from round to fan with all intermediate patterns.
- Minimum diameter of opening into which extension can be inserted $1\frac{3}{4}$ ".

BINKS MODEL EN—45° ANGLE

- Use when spray must be at 45° angle.
- Spray head may be turned in any direction.
- Spray pattern adjustable from round to fan with all intermediate patterns.
- Minimum diameter of opening into which extension can be inserted $2\frac{1}{2}$ ".

BINKS MODEL EB—90° ANGLE

- Use when spray must be at 90° angle.
- Spray head may be turned in any direction.
- Spray pattern adjustable from round to fan with all intermediate patterns.
- Minimum diameter of opening into which extension can be inserted 3".

BINKS MODEL C—360° CIRCULAR

- For spraying inside of pipe and tubing.
 - Minimum diameter of opening into which extension can be inserted $\frac{3}{4}$ ".
 - Nozzle tips available: 52-363, right angle spray; 52-364, reverse spray; 52-365, forward spray.
- Please specify tip desired.

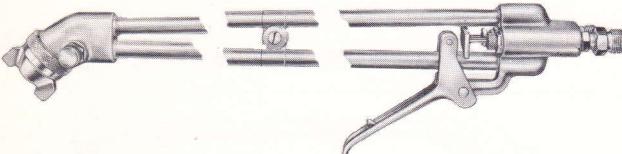

Binks Manufacturing Company
3114-44 CARROLL AVE., CHICAGO 12 • BRANCHES IN ALL PRINCIPAL CITIES

NOZZLE AND GUN EXTENSIONS

- For use with spray gun models 18, 62 and 21.
- For spraying inside of pipe and tubing.
- Diameter of extension $\frac{3}{8}$ ".

- For use with spray gun models 18, 62 and 21.
- For spraying surfaces at distance or location not otherwise accessible.
- Diameter of extension $\frac{7}{16}$ ".

BINKS MODEL 24 POLE GUN

Model 24 pole gun

Shpg. Wts.: 4'—15 lbs. 6'—20 lbs. 8'—25 lbs. 10'—30 lbs.

BINKS MODEL SC — 360° CIRCULAR

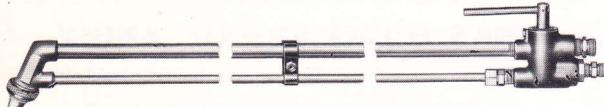

Available lengths: 9", 12", 15", 18", 21", 27", 33", 39", 51", 63", 75", 87".

BINKS MODEL SA — STRAIGHT CONE

Available lengths: 6", 9", 12", 15", 18", 24", 30", 36", 48", 60", 72", 84".

BINKS MODEL 125 POLE GUN

Model 125 pole gun

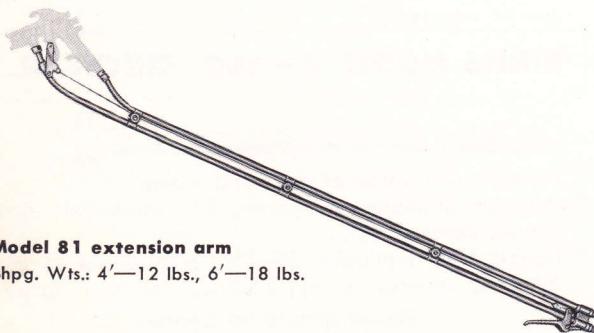

Shpg. Wts.: 4'—12 lbs.; 6'—14 lbs.; 8'—16 lbs.

Self-contained extension gun

- For applying fluids to areas outside normal reach or to roofs, floors, railroad ties, etc.
- Air and fluid shut-off at handle.
- Four lengths available:
4'—model 52-923 6'—model 52-924
8'—model 52-925 10'—model 52-926

See Nozzle Selection Chart, pages 13 and 20.

BINKS MODEL 81 EXTENSION ARM

Model 81 extension arm

Shpg. Wts.: 4'—12 lbs., 6'—18 lbs.

Lightweight, well-balanced extension for spraying ceilings, walls, roofs and similar surfaces beyond ordinary reach.

- Use only with spray gun models 18, 7 and 62*.
- Gun is remote-controlled by trigger at base of extension. See illustration.
- Easy to attach to gun.
- Air hose connection $\frac{1}{4}$ inch St.P.
- Fluid hose connection $\frac{3}{8}$ inch St.P.
- Two lengths available:
4'—model NG-296 6'—model NG-297

Be sure to specify model required.

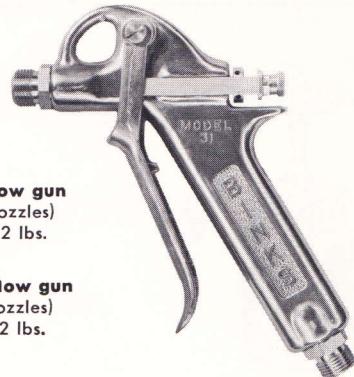

*Adapter AZ-131—Required to attach extension to model 62 gun.

SPECIAL PURPOSE GUNS

BINKS MODEL 31 FLOW GUN

- Uses no atomizing air but flows material on under hydraulic pressure.
- Lightweight, simple in design. Easy to clean and repair.
- Shut-off at nozzle base.
- Fluid connection $\frac{3}{8}$ inch St. P.
- Three sizes nozzle connections: $\frac{1}{4}$ ", $\frac{3}{8}$ ", $\frac{1}{2}$ ", all Straight pipe. Be sure to specify size desired.
- See nozzle chart below. (Nozzles not included.)
- 31V for use with ceramic materials. Equipped with seat and needle to resist wear.

To flow sealing compounds such as rubber cement, asphalt or similar materials or to seal gaskets, mouldings, cracks, corners and crevices.

Model 31 flow gun
(less fluid nozzles)
Shpg. Wt. 2 lbs.

Model 31V flow gun
(less fluid nozzles)
Shpg. Wt. 2 lbs.

BINKS MODEL 171 FLOCK SPRAY GUN

Rugged flocking spray gun and cup.

- Two cups available: one-quart and two-quart size. Both have large openings. Be sure to specify size desired.
- Air connection $\frac{1}{4}$ " St. P.
- Three control valves:
 - One controls spray pattern from round to fan.
 - One controls air for flock velocity.
 - One controls amount of flock issuing from nozzle.

Model 171 gun with qt. cup Shpg. Wt. 4 lbs.

Model 171 gun with 2-qt cup Shpg. Wt. $4\frac{1}{2}$ lbs.

Cups only: Model 80-3, 1-qt. capacity Shpg. Wt. 1 lb.

Model 80-4, 2-qt. capacity Shpg. Wt. $1\frac{1}{2}$ lbs.

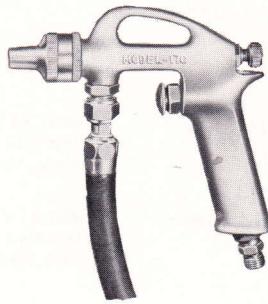

Binks Manufacturing Company

SPECIAL PURPOSE GUNS

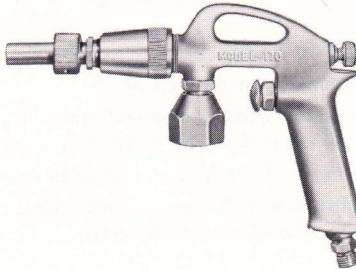

BINKS MODEL 170 GUN

Model 170 with
81-500 cup
Shpg. Wt. 4 lbs.

Model 170 with
3/8" siphon hose
Shpg. Wt. 6 lbs.

Model 170A
car-washing gun
Shpg. Wt. 3 lbs.

- Attach an 81-500 siphon cup and spray cleaning solvents and other fluids.
- Attach the 8' length of hose and spray foundry molds and all types of lubricating oils or cleaning solvents. Will siphon fluid from container on floor. Shut off fluid and use for dusting or drying.
- Attach set of 51-44 fittings and convert 170 to 170A, an excellent car-washing gun. Shut off fluid and use for blowing off.

A sturdy, all-purpose model which you can adapt for diversified uses.

Model 170 gun.....Shpg. Wt. 2 lbs.

Model 81-500 cup.....Shpg. Wt. 1 lb.

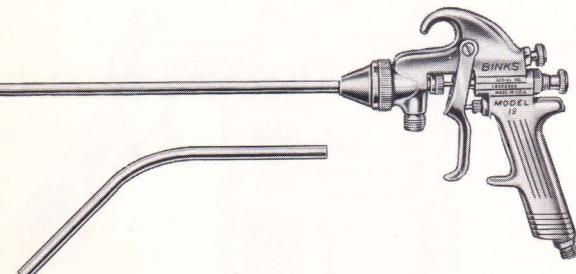

8' length H-208 fluid hose, $\frac{3}{8}$ inch I.D., one $\frac{3}{8}$ inch connection furnished.....Shpg. Wt. 2 lbs.

Model 170A gun.....Shpg. Wt. 3 lbs.

51-44 Fittings to convert 170 gun to 170A..Shpg. Wt. $\frac{1}{2}$ lb.

51-45 Fittings to convert 170A gun to 170..Shpg. Wt. $\frac{1}{2}$ lb.

BINKS CLEANING GUN

Cleaning Spray Gun

Straight extension nozzle
set up: 68xT928

T-928 straight extension nozzle only.....Shpg. Wt. $\frac{1}{2}$ lb.
T-929 45° extension nozzle only.....Shpg. Wt. $\frac{1}{2}$ lb.

45° extension nozzle
set up: 68xT929

For industrial degreasing and cleaning work

- Will operate from pressure tank or gravity bucket.
- Will spray all cleaners and solvents such as varsol, kerosene, naphtha.
- Can be ordered with gun models, 18, 62, 29 and 21.
- Straight or 45° Extension, Length 10".

* Model 18 gun with extension.....Shpg. Wt. 3 lbs

* Model 62 gun with extension.....Shpg. Wt. 3 lbs.

* Model 29 gun with extension.....Shpg. Wt. 3 lbs.

* Model 21 gun with extension.....Shpg. Wt. 4 lbs.

*Specify extension number

SPECIAL PURPOSE GUNS

BINKS BLOW GUNS—MODELS 150 AND 190

Model 150 gun
with $\frac{1}{4}$ inch tapered pipe (F) opening
Shpg. Wt. $\frac{1}{2}$ lb.

Model 190 gun
with $\frac{1}{4}$ inch St. P. (M) connection
Shpg. Wt. 1 lb.

Model 60-14 nozzle extension
Shpg. Wt. 6 oz.

Ideal for dusting, drying, blowing out chips, filings, dust, shavings, etc., from machines.

- Small, strong, durable, streamlined lightweight guns.
- Model 150 equipped with cartridge type non-pinch air valve which is easily removed as a unit. Has same air capacity as model 190.
- Model 190 has comfortable pistol grip and is well balanced.
- Model 60-14 nozzle extension 6" long for use with both models.

Air consumption—specify orifice desired*

$\frac{1}{16}$ " orifice	50 lbs.	3 $\frac{1}{2}$ C.F.M.
$\frac{3}{64}$ " orifice	50 lbs.	5 C.F.M.
$\frac{3}{32}$ " orifice	50 lbs.	8 $\frac{1}{2}$ C.F.M.

*Note: The standard orifice for model 150 is $\frac{3}{64}$ ".
The standard orifice for model 190 is $\frac{1}{16}$ ".

BINKS MODEL 160B OIL SPRAY GUN

Model 160B oil spray gun
with metal cup
Shpg. Wt. 4 lbs.

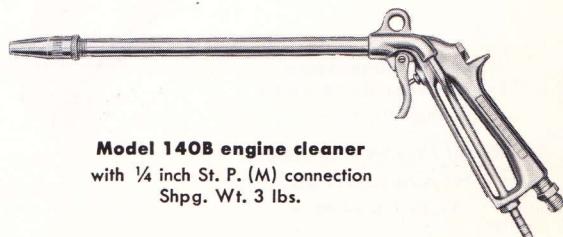

For applying oil or lubricant to automotive equipment requiring finely atomized spray.

- Spray can be adjusted to light or heavy by turning nozzle.
- Two nozzles available: straight or angle. Specify nozzle desired.
- Requires 3 $\frac{1}{2}$ C.F.M. at 50 lbs.
- Air connection $\frac{1}{4}$ inch St. P.
- Length of tube and nozzle 10 inches.
- Specify 57-124 if straight nozzle is desired.
- Specify 57-109 if angle nozzle is desired.

BINKS MODEL 140B ENGINE CLEANER

For spraying of automotive equipment, motors, machinery and parts with cleaning solvents.

- Furnished with tubing for siphoning fluid from container.
- Requires 14 C.F.M. at 50 lbs.
- Length of tube and nozzle 10 inches.

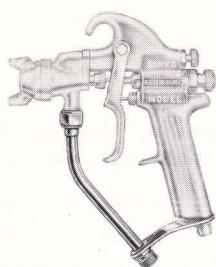

Model 140B engine cleaner
with $\frac{1}{4}$ inch St. P. (M) connection
Shpg. Wt. 3 lbs.

Binks Manufacturing Company
3114-44 CARROLL AVE., CHICAGO 12 • BRANCHES IN ALL PRINCIPAL CITIES

SPECIAL GUN ATTACHMENTS

T-957 connection
Shpg. Wt. 8 oz.

BINKS BOTTOM FLUID CONNECTION

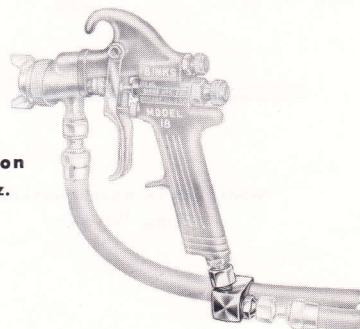

For use with spray gun models 18, 7 and 62.

- Brings air and fluid hose connections together at handle of gun.
- Gives operator better control of gun.
- Connections $\frac{3}{8}$ inch St.P.

BINKS AIR AND FLUID BOTTOM CONNECTION

For use with all Binks spray guns having bottom air connection.

- Clips $\frac{3}{8}$ " fluid hose to air connection at bottom of gun.
- Minimizes danger of hose dragging over work.
- Air hose connection $\frac{1}{4}$ inch St.P.

T-977 connection
Shpg. Wt. 10 oz.

BINKS RECIRCULATING CONNECTION

For use with spray gun models 18, 7 and 62.

- Use if fluid feed to gun is by means of paint circulating system with recirculating feature (where pigment settles rapidly) or where fluid is heated.
- Connections $\frac{3}{8}$ inch St.P.

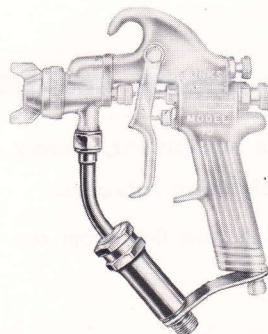

SC-250 connection
for gun models 18 and 7
Shpg. Wt. 14 oz.

Model 72-799 connection,
for gun model 62
Shpg. Wt. 14 oz.

BINKS FLUID STRAINERS

For use with spray gun models 18, 7 and 62.

- Attach to fluid inlet on gun for straining fluids as they enter.
- Connections $\frac{3}{8}$ inch St. P.
- Strainer to fit all guns, or to be mounted on pressure tank or fluid line.

T-988 fluid strain-
er, 100 mesh
T-982 fluid strain-
er, 150 mesh
Shpg. Wt. 1 lb.

T-987 screen only,
100 mesh
T-980 screen only,
150 mesh
Shpg. Wt. 4 oz.

T-990 fluid strain-
er, 100 mesh
T-981 fluid strain-
er, 150 mesh
Shpg. Wt. 14 oz.

NOZZLE SELECTION CHART

GENERAL INFORMATION ON SELECTING PROPER NOZZLE COMBINATIONS

When selecting the nozzle combination for a Binks Spray Gun, there are several points to be considered, namely; the material to be sprayed, the method of feeding the material to the gun and the volume of air available for the spraying operation. On the following pages, you will find recommended nozzle combinations for all Binks Guns. You will notice these charts give the user a choice of pressure or siphon feed; external or internal atomization as well as air requirements for different types of fluids which can be sprayed.

HOW TO USE THE CHARTS

Type of Fluid to be Sprayed

In this column are listed the average sprayable fluids along with a few special effect nozzles. Although the list does not include all the different types of fluid, a fluid which has the same characteristics as one of those listed will spray the same. On the other hand, if the fluid you wish to spray is not listed or does not have the same characteristics as one of those listed, contact a Binks Representative for the proper recommendation.

Fluid Nozzle

The choice of the fluid nozzle is determined by the speed of application required and the viscosity of the fluid to be sprayed. The greater the speed of application, the larger the fluid opening required—the heavier or more viscous the fluid, the larger the fluid opening required. Referring to the "Fluid Nozzle Orifice Size" Chart, those fluid nozzles which can be changed within an air nozzle are indicated. If the fluid nozzle is not listed as being interchangeable or is not shown with other types of air nozzles, the nozzle designation or prefix number of the air and fluid nozzles must be the same.

Air Nozzle

The choice of the air nozzle will be determined by the type of material to be sprayed and the volume of air available for the gun. Air nozzles are made in two general categories—External Mix and Internal Mix.

The *External Mix Nozzle*, which is generally used, may be obtained in either siphon or pressure feed, but its operation in atomizing the fluid will be the same in either case. The external mix nozzle accomplishes the atomization just as its name implies—outside of the nozzle by the action of air jets. This type of nozzle can be used on all types of fluids and the spray pattern is adjustable from round to fan with all intermediate patterns. The external mix nozzle is used for fine finishes and most production work as its spray pattern is not affected by wear or the build up of dry material.

The *siphon type external mix nozzle* will draw or siphon the material from a cup and atomize the fluid coming from the fluid nozzle. On all siphon nozzles, the letter "S" will appear after the nozzle designation and may be followed by another letter denoting its place in the series. The siphon type external mix nozzle

is generally used for refinishing, touch-up or small areas which do not require large quantities of paint.

The *pressure type external mix nozzle* requires pressure to feed the material to the nozzle. The pressure may be developed by a pressure cup, a pressure tank or any of the many types of pumps. On all pressure nozzles, the letter "P" will appear after the nozzle designation and may be followed by another letter denoting its place in the series. This type of nozzle is used for production work and where the quantity of fluid to be handled is large. The pressure type nozzle has all the advantages of a siphon type nozzle as well as accurate control and greater range of the fluid flow. Also, it is not limited to the size of the paint container as is the siphon nozzle.

The *internal mix type nozzle* accomplishes the atomization by mixing the air and fluid within the air nozzle. The spray pattern of an internal mix nozzle is determined by the shape of the nozzle and cannot be changed. The advantage of the internal nozzle is that it requires less air to operate and produces slightly less overspray. An internal mix nozzle must be used with pressure equipment and only with slow dry fluid. It should never be used with abrasive fluids. It is primarily used for maintenance spraying and for heavy materials where a fine finish is not required.

CFM Required

The cubic feet per minute (CFM) required at 50 pounds per inch pressure as listed in this column is the actual air used by the air nozzle. If the spraying pressure is increased, the volume of air required by the nozzle will increase, while a decrease in the spraying pressure will decrease the air consumption. In selecting a nozzle, be certain that the volume of air available is sufficient to supply the gun as well as your other equipment requiring air. Remember that the pressure your compressor develops has no bearing on the volume of air required for the spray gun. As a general rule, you can assume that a compressor will produce between 3 to 5 C.F.M. per horsepower.

The volume of air used by the nozzle is the yardstick by which one may measure the speed of application as well as the degree of atomization. The greater the air consumption, the faster the fluid may be applied or the finer a given amount of fluid can be atomized.

WHEN SELECTING NOZZLES FOR YOUR GUN, BE SURE TO
CHECK THE FOLLOWING POINTS:

- Be certain your air supply is sufficient to operate nozzles selected.
- For light material, select small fluid opening. For heavier material, select larger fluid opening.
- The air volume (C.F.M.) of the air nozzle will determine the speed of application and degree of atomization.

*P-External atomizing: for use with pressure tank or pressure cup.
Spray pattern adjustable round to fan.

*S-External atomizing: for use with siphon cup or gravity bucket.
Spray pattern adjustable round to fan.

*I-Internal atomizing: for use with pressure equipment only.
Spray pattern fixed as specified.

† Fluid nozzle can be furnished in stainless steel. If required, specify when ordering. All needle valves are hardened stainless steel.

WHEN SELECTING NOZZLES FOR YOUR GUN, BE SURE TO
CHECK THE FOLLOWING POINTS:

- Be certain your air supply is sufficient to operate nozzles selected.
- For light material, select small fluid opening. For heavier material, select larger fluid opening.
- The air volume (C.F.M.) of the air nozzle will determine the speed of application and degree of atomization.

*P-External atomizing: for use with pressure tank or pressure cup. Spray pattern adjustable round to fan.

*S-External atomizing: for use with siphon cup or gravity bucket. Spray pattern adjustable round to fan.

*I-Internal atomizing: for use with pressure equipment only. Spray pattern fixed as specified.

† Fluid nozzle and needle valve can be furnished in stainless steel. If required, specify when ordering.

*I—Internal atomizing: for use with pressure equipment only.
Spray pattern fixed as specified.

Note 1. Model 21A & 21AV Guns

These guns use the same external nozzles as shown on above chart.
Only one size needle (NG-402) furnished.

Note 2. Model 21B & 21BV Guns

These guns use the same external nozzles as shown on above chart.
No needle valve required.

† Fluid nozzle can be furnished in stainless steel. If required, specify when ordering. All needles are hardened stainless steel.

SIPHON AND PRESSURE CUPS

SIPHON CUPS

ONE QUART CLAMP TYPE CUP

- 81-500 cup complete, $\frac{3}{8}$ " St. P.
- 81-501 cup complete, $\frac{5}{8}$ "-18
- 81-502 cup complete, $\frac{9}{16}$ "-20
- 81-503 cup complete, $\frac{1}{4}$ " St. P.
- 82-47 quart cup only.
Shpg. Wt. 1 lb. each
- 81-400 attachment only, $\frac{3}{8}$ " St. P.
- 81-401 attachment only, $\frac{5}{8}$ "-18
- 81-402 attachment only, $\frac{9}{16}$ "-20
- 81-403 attachment only, $\frac{1}{4}$ " St. P.
Shpg. Wt. $\frac{1}{2}$ lb. each

ONE QUART METAL SCREW TYPE CUP

- 81-560 cup complete, $\frac{3}{8}$ " St. P. For 18, 7, 62, 29 and 26 guns. Shpg. Wt. 1 lb.
- 81-562 cup complete, $\frac{3}{8}$ " St. P. With 72-54 adapter for 15 gun. Shpg. Wt. 1 lb.
- 56-618 cup only. Shpg. Wt. 8 oz.
- 81-460 attachment only. Shpg. Wt. 8 oz.
- 81-6 sealtight cover. Shpg. Wt. 6 oz.

EIGHT OUNCE CLAMP TYPE CUP

- 81-540 cup complete, $\frac{1}{4}$ " St. P. For 15 gun.
Shpg. Wt. 8 oz.
- 81-541 cup complete, $\frac{1}{4}$ " St. P. With 72-55 adapter for 26 gun. Shpg. Wt. 8 oz.
- 55-444 cup only. Shpg. Wt. 4 oz.
- 81-440 attachment only. Shpg. Wt. 4 oz.

PRESSURE CUPS

TWO QUART CUP WITH PRESSURE REGULATOR

- 80-202, for use with gun model 7.
- 80-212, for use with gun model 18.
- 80-216, for use with gun model 29.
- 80-254, for use with gun model 62.
Shpg. Wt. 2 $\frac{1}{4}$ lbs. each
- 80-4, two quart cup only. Shpg. Wt. 1 $\frac{1}{2}$ lbs.

TWO QUART CUP WITH AIR CONNECTION

- 80-203, for use with gun model 7.
- 80-213, for use with gun model 18.
- 80-217, for use with gun model 29.
- 80-255, for use with gun model 62.
Shpg. Wt. 3 lbs. each
- 80-4, two quart cup only. Shpg. Wt. 1 $\frac{1}{2}$ lbs.

NOTE: Gun models 18, 7, 62, 29 and 26 have $\frac{3}{8}$ " fluid connections. Gun model 15 has $\frac{1}{4}$ " fluid connection.

ONE PINT CLAMP TYPE CUP

- 81-520 cup complete, $\frac{3}{8}$ " St. P.
- 81-521 cup complete, $\frac{5}{8}$ "-18
- 81-522 cup complete, $\frac{9}{16}$ "-20
- 81-523 cup complete, $\frac{1}{4}$ " St. P.
- 82-46 pint cup only.
Shpg. Wt. 1 lb. each
- 81-420 attachment only, $\frac{3}{8}$ " St. P.
- 81-421 attachment only, $\frac{5}{8}$ "-18
- 81-422 attachment only, $\frac{9}{16}$ "-20
- 81-423 attachment only, $\frac{1}{4}$ " St. P.
Shpg. Wt. $\frac{1}{2}$ lb. each

ONE PINT GLASS SCREW TYPE CUP

- 81-561 cup complete, $\frac{3}{8}$ " St. P.
Shpg. Wt. 1 $\frac{1}{4}$ lbs.
- 81-461 attachment only, $\frac{3}{8}$ " St. P.
Shpg. Wt. 8 oz.
- 81-8 pint cup only. Shpg. Wt. 12 oz.
- 81-6 sealtight cover. Shpg. Wt. 6 oz.

EIGHT OUNCE GLASS SCREW TYPE CUP

- 81-580 cup complete, $\frac{1}{4}$ " St. P. For 15 gun.
Shpg. Wt. 12 oz.
- 81-581 cup complete, $\frac{1}{4}$ " St. P. With 72-55 adapter for 26 gun. Shpg. Wt. 12 oz.
- 81-7 cup only. Shpg. Wt. 8 oz.
- 81-480 attachment only. Shpg. Wt. 6 oz.
- 81-5 sealtight cover. Shpg. Wt. 6 oz.

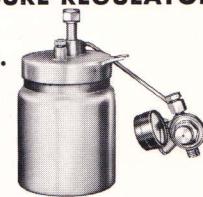

SEALTIGHT COVERS

- Use when fluid is to be stored in the cup.
- 81-4 cover, for use with cup models 82-47, quart size, and 82-46, pint size. Shpg. Wt. 6 oz.
- 55-32 cover, for use with cup model 55-444, 8 oz. size. Shpg. Wt. 4 oz.

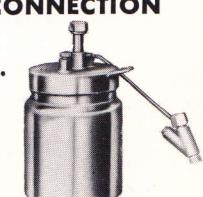

ONE QUART CUP WITH PRESSURE REGULATOR

- 80-200, for use with gun model 7.
- 80-210, for use with gun model 18.
- 80-214, for use with gun model 29.
- 80-256, for use with gun model 62.
Shpg. Wt. 2 lbs. each
- 80-3, quart cup only. Shpg. Wt. 1 lb.

ONE QUART CUP WITH AIR CONNECTION

- 80-201, for use with gun model 7.
- 80-211, for use with gun model 18.
- 80-215, for use with gun model 29.
- 80-257, for use with gun model 62.
Shpg. Wt. 2 lbs. each
- 80-3, quart cup only. Shpg. Wt. 1 lb.

Use maximum 50 lbs. working pressure with pressure cups

OIL AND WATER EXTRACTORS

BINKS MODEL AO-120 EXTRACTOR

Capacity 75 C.F.M.

- Use this model for simultaneous operation of two heavy-duty production spray guns and two dusting guns.
- Drop forged bronze regulator will maintain pressure setting.
- Metallic spiral baffle.
- Filter is cartridge type, wound of long-fiber absorbent material. Washable or replaceable.
- Two drains furnished—hand and semi-automatic. Latter operates when pressure is shut off.
- Gauge shows regulated pressure.*
- Air inlet $\frac{3}{4}$ inch St. P. (F).
- Two main line pressure outlets $\frac{1}{4}$ inch St. P. (M).
- Two regulated pressure outlets $\frac{1}{4}$ inch St. P. (M).

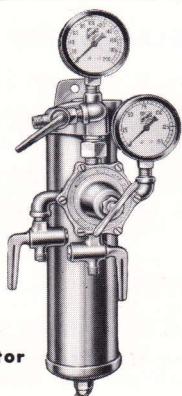

Model AO-120 extractor
Shpg. Wt. 14 lbs.

*Gauge, nipple and T to show main line pressure—Order Model AO-887
Double air outlet adapter, $\frac{1}{4}$ inch tapered pipe (F) inlet, $\frac{1}{4}$ inch St. P. (M) outlets—Order AO-751.

BINKS MODEL 538A EXTRACTOR

Capacity 40 C.F.M.

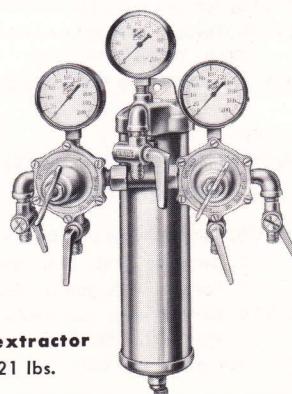

Model 538A extractor
Shpg. Wt. 14 lbs.

- Two spray guns and one dusting gun can be in operation simultaneously.
- Drop forged bronze regulator will maintain pressure setting.
- Metal filter and metal baffle insure clean, dry air. Easily cleaned.
- Upper gauge indicates main line pressure.
- Lower gauge shows regulated pressure.
- Air inlet $\frac{1}{2}$ inch tapered pipe (F).
- One main line pressure outlet $\frac{1}{4}$ inch St. P. (M).
- Two regulated pressure outlets $\frac{1}{4}$ inch St. P. (M).

BINKS MODEL 539A EXTRACTOR

Capacity 60 C.F.M.

- Four spray guns and one dusting gun can be in operation simultaneously.
- Drop forged bronze regulators maintain pressure settings. Capable of independent regulation.
- Metal filter and metal baffle insure clean, dry air. Easily cleaned.
- Air inlet $\frac{1}{2}$ inch tapered pipe (F).
- One main line pressure outlet $\frac{1}{4}$ inch St.P. (M).
- Four regulated pressure outlets $\frac{1}{4}$ inch St.P. (M).

Model 539A extractor
Shpg. Wt. 21 lbs.

OIL AND WATER EXTRACTORS

BINKS MODEL 86-124 EXTRACTOR

Capacity 100 C.F.M.

- Dual baffle and centrifugal filter action.
- Easily replaceable filter.
- One inch N.P.T. Inlet and Outlet.

Model 86-124 Oil and Water Extractor—Standard
12½" length. Shpg. Wt. 12 lbs.

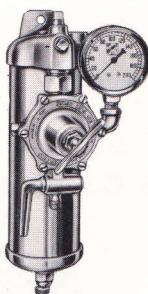

Model 86-126 Oil and Water Extractor—Same as
above but 8½" length. Shpg. Wt. 10 lbs.

Model 86-876 Replaceable Filters for both models.

Model 86-124 extractor
Shpg. Wt. 12 lbs.

BINKS MODEL 545A EXTRACTOR

Model 545A extractor
Shpg. Wt. 11 lbs.

Capacity 30 C.F.M.

- For single gun operation.
- Drop forged bronze regulator will maintain pressure setting.
- Metallic baffle cleans air, eliminates impurities. Easily cleaned.
- Pressure gauge shows regulated pressure.
- Air inlet ½ inch tapered pipe (F).
- Regulated outlet ¼ inch St.P. (M).

BINKS MODEL 544A EXTRACTOR

Capacity 30 C.F.M.

- Use when regulator is not required or is already available.
- Air inlet ½ inch tapered pipe (F).
- Outlet furnished with SC-55 adapter, ¼ inch St.P. (M) x ¾ inch St.P. (F).
- Can be converted to model 545A:

Model AO-851 regulator and gauge with fittings
to convert 544A to 545A.....Shpg. Wt. 2½ lbs.

Model 544A extractor
Shpg. Wt. 6 lbs.

EXTRACTORS PRESSURE REGULATORS AND GAUGES

BINKS MODEL AO-102 EXTRACTOR

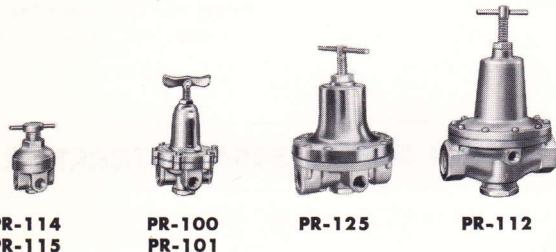

Capacity 20 C.F.M.

- For single gun operation.
- Phenolic impregnated filter, easily removable for cleaning.
- Air inlet $\frac{1}{2}$ inch tapered pipe (F).
- Regulated outlet $\frac{1}{4}$ inch St.P. (M).

Model AO-102 extractor
Shpg. Wt. 10 lbs.

PR-114: CAPACITY 15 C.F.M.

$\frac{1}{4}$ inch (F) pipe inlet, three $\frac{1}{4}$ inch regulated air outlets. Shpg. Wt. 2 lbs.

PR-115: CAPACITY 15 C.F.M.

$\frac{1}{4}$ inch (F) pipe inlet, $\frac{1}{4}$ inch bypass outlet, two $\frac{1}{4}$ inch regulated outlets. Shpg. Wt. 2 lbs.

PR-100: CAPACITY 35 C.F.M.

$\frac{3}{8}$ inch (F) pipe inlet, three $\frac{1}{4}$ inch regulated air outlets. Shpg. Wt. 3 lbs.

PR-101: CAPACITY 35 C.F.M.

$\frac{1}{4}$ inch (F) pipe inlet, $\frac{1}{4}$ inch bypass outlet, one $\frac{1}{4}$ inch and one $\frac{3}{8}$ inch regulated outlet. Shpg. Wt. 3 lbs.

PR-125: CAPACITY 60 C.F.M.

$\frac{1}{2}$ inch (F) pipe inlet, two $\frac{1}{4}$ inch and one $\frac{1}{2}$ inch regulated air outlets. Shpg. Wt. 7 lbs.

PR-112: CAPACITY 100 C.F.M.

$\frac{3}{4}$ inch (F) pipe inlet, two $\frac{1}{4}$ inch and one $\frac{3}{4}$ inch regulated air outlets. Shpg. Wt. 10 lbs.

All connections tapered pipe.

MODEL AO-836 BELT TYPE EXTRACTOR

Capacity up to 8 C.F.M. and 50 lbs. pressure

- For use with small portable compressors.
- Designed to be hung from operator's belt.
- Phenolic impregnated filter, easily removable for cleaning.

AO-836 Extractor Shpg. Wt. 1 lb.

BINKS PRESSURE GAUGES

Bottom Outlet

Back Outlet

All models have $\frac{1}{4}$ inch tapered pipe (M) connection.
Shpg. Wt. 1 lb.

Eight Sizes Available

D-1636— 15 lbs.	D-1290—150 lbs.
D-1414— 30 lbs.	D-2218—160 lbs.*
D-386 — 60 lbs.	D-387 —200 lbs.
D-1355—100 lbs.	D-2219—300 lbs.*

*Back outlet type.

Be sure to specify model number.

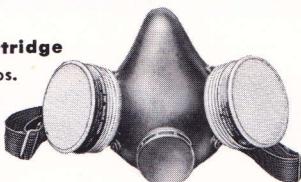

RESPIRATORS

BINKS CARTRIDGE-TYPE RESPIRATORS

Model 8 approved by U. S. Bureau of Mines for non-emergency gas respirator for organic vapors.

Model 8—Twin-Cartridge

Shpg. Wt. 1 1/4 lbs.

Model 6—Single Cartridge

Shpg. Wt. 1 lb.

- Comfortable, soft, lightweight rubber body conforms to face.
- Intake and exhaust valves large, quick-acting, assure easy breathing.
- Head band elastic and adjustable.
- Cartridges furnished with chemically treated filter.
- Metal clamp available which holds paper filters onto cartridges, increasing their life.*
- Box of 10 cartridges, order #40-13.

*Metal clamp, for paper filters, order #40-21.

Box of 50 paper filters, order #40-32.

BINKS FILTER-TYPE RESPIRATOR

Use if air contains paint mist or dusts from grinding, polishing, scraping, blowing-off operations.

- Intake and exhaust valves quick-acting.
- Soft rubber body conforms to face.
- Elastic headband adjustable.
- Filter pads easily replaced when necessary.
- Box of 100 filter pads, order #40-5.
- Cloth facelet, order #40-10.

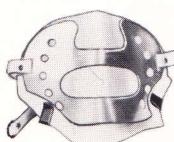

Model 2A

Shpg. Wt. 1 lb.

BINKS PAD-TYPE RESPIRATOR

Use where air contains paint mist or irritating dusts.

Model 10

Shpg. Wt. 6 oz.

- Aluminum frame flexible, lightweight, holds filter pad over operator's nose and mouth.
- Filter pad easily replaced.
- Box of 25 filter pads, order #40-15.

BINKS HOOD-TYPE RESPIRATOR

For use when ventilation is inadequate or if air is contaminated with impurities which are harmful to eyes, ears, nose or throat.

- Lightweight, cool, comfortable.
- Air fed in at top of hood, escapes from bottom around neck or through opening in window.
- Air volume controlled by valve furnished with hood.
- Two types of slide-in plastic windows furnished: one plain, one with center cut-out.
- Furnished with air hose and fittings for attaching to gun inlet.
- Replacement hood only, order #40-47.

Model 40-54

Shpg. Wt. 3 lbs.

BINKS PROTECTIVE GOGGLES

Model 103

Shpg. Wt. 8 oz.

- Contour design assures maximum comfort and protection.

AIR MOTOR DRIVEN AGITATOR UNITS

BINKS AGITATORS FOR MEDIUM-SIZE OPEN-TOP CONTAINERS

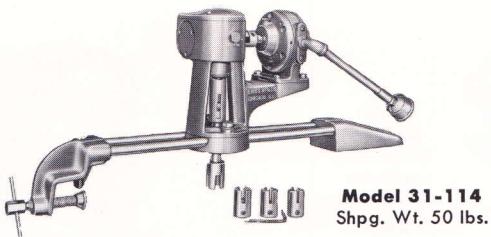

For agitating fluids such as lacquer or paint.

- Choice of "C" or stanchion clamp. "C" clamp locks agitator securely to fluid container. Stanchion clamp locks to 1" pipe and can be raised or lowered as desired.
- Agitator propellers aluminum. Agitator shaft stainless steel.
- Air motor requires 4 to 8 C.F.M.
- Speed controlled by valve on motor.

BINKS AGITATOR SHAFT ADAPTER UNIT

Model 31-114
Shpg. Wt. 50 lbs.

Can be adapted to any lacquer or paint container already equipped with agitator.

- Air motor requires 4 to 8 C.F.M.
 - Speed controlled by valve on motor.
 - Four adapters furnished will fit all standard agitator shafts:
- | | |
|--|---------------------------------------|
| 31-21 $\frac{7}{16}$ " Square coupling | 31-23 $\frac{1}{2}$ " Square coupling |
| 31-22 $\frac{5}{8}$ " Square coupling | 31-24 $\frac{3}{8}$ " Slot coupling |

Designed for laboratories, hospitals, schools, etc., where a small agitator and small containers are used.

- Shaft and motor can be raised or lowered on vertical bar.
- Shaft stainless steel, propeller aluminum.
- Air motor requires 4 to 8 C.F.M.
- Speed controlled by valve on motor.
- Model 31-100 will hold one-gallon and five-gallon standard paint cans.

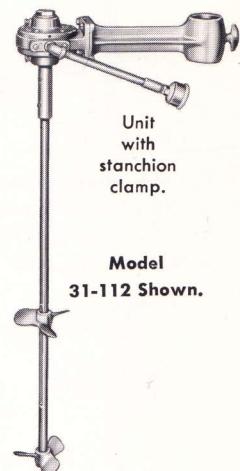

Model
31-106
Shown.

HEAVY FLUIDS AGITATOR

- NOTE: Model 31-120 similar to models shown but is intended for heavy fluids such as undercoating, siding or roofing materials. Model 31-120 has a "C" clamp. Length of agitator shaft 32 inches. Shipping wt. 33 lbs.

Models 31-101—31-106
Shpg. Wt. 30 lbs.

Model
31-112 Shown.

Models 31-107—31-112
Shpg. Wt. 30 lbs.

BINKS AGITATORS FOR LARGE OPEN-TOP CONTAINERS

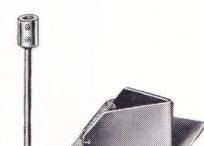

For agitating fluids such as lacquer or paint.

- Agitator shaft stainless steel.
- Paddles aluminum.
- Air motor requires 4 to 8 C.F.M.
- Speed controlled by valve on motor.

Model 31-113 30" shaft only
Shpg. Wt. 60 lbs.

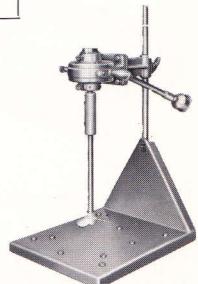

BINKS AGITATOR FOR SMALL OPEN-TOP CONTAINERS

Model 31-73
Shaft and cup holder
Shpg. Wt. 5 lbs.

To be used with Model 31-100 at right for agitating fluid in small containers.

Model 31-100
Shpg. Wt. 40 lbs.

PRESSURE FLUID TANK ACCESSORIES

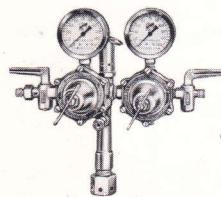

Model PR-102
air control unit
No regulator
Shpg. Wt. 2 lbs.

- For use where pressure regulator is already available for fluid control. Equipped with air inlet cock, safety valve and relief valve.

Model PR-103
air control unit
One regulator
Shpg. Wt. 3 lbs.

- To regulate pressure on fluid in tank. Recommended for use where spray gun air is from a permanently mounted extractor. Equipped with air inlet, outlet cock, safety valve, relief valve, regulator and gauge. Outlet air bypasses regulator.

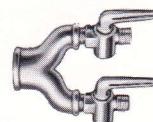

Model PR-104
air control unit
2 Regulators
Shpg. Wt. 5 lbs.

- Recommended for use with standard and portable spray painting outfits. Equipped with air inlet, outlet cock, safety valve, relief valve, two regulators and gauges—one to regulate fluid in tank and one to regulate atomizing air pressure at gun.

Caster base
Be sure to specify size

- For easy moving of pressure tanks. A size for every tank. Special heavy duty model for 60 gallon tanks. See "Accessories" tables on following pages for model numbers and shipping weights.

D-1849
double fluid bottom outlet
Shpg. Wt. 1 lb.

- To operate two spray guns from one pressure tank. Furnished on 30 and 60 gallon tanks.

Model 28-103
funnel type fluid strainer
Shpg. Wt. 3 lbs.

- Designed to fit on pressure fluid tank filler outlet. Funnel bowl 10" in diameter. Strainer screen easily removed by lifting off retainer ring. For replacement screen, order Model 28-6 screen.

Model 31-116
air motor agitator drive unit
Shpg. Wt. 20 lbs.

- For use with Binks tanks equipped with agitators. Speed can be regulated from 15 to 90 R.P.M. Mounting bolts and hose furnished.

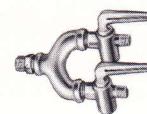

Model 31-119
electric motor drive unit
Shpg. Wt. 75 lbs.

- Recommended for use with 30 and 60 gallon Binks tanks equipped with agitators. Explosion proof motor. Specify current Constant speed 36 R.P.M.

Model D-1848
double fluid top outlet
Shpg. Wt. 1 lb.

- To operate two spray guns from one pressure tank. Furnished on 30 and 60 gallon tanks.

Model D-1852
double air outlet
Shpg. Wt. 1 lb.

- To operate two spray guns from one tank, where air must pass through tank control.

Model D-1846
fluid strainer 100 mesh
Model D-2090
fluid strainer 50 mesh

- For use with pressure tanks.

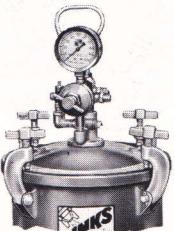

Model D-1256
screen only 100 mesh
Model D-2089
screen only 50 mesh
Shpg. Wt. 1 lb. Shpg. Wt. 4 ozs.

- Inner containers. Be sure to specify size.
- Recommended for use where frequent changes of color are necessary or where material used will attack galvanized tank. Available for all tanks except non-A.S.M.E. Galvanized containers with top outlets available for all A.S.M.E. tanks. Stainless steel inner containers available in 10, 30 and 60 gallon sizes. 10 gallon S.S. container has top outlet. 30 and 60 gallon S.S. containers have bottom outlets. See "Accessories" tables on following pages for model numbers and shipping weights.

TWO-GALLON PRESSURE FLUID TANKS

BINKS NON-A.S.M.E. TANKS

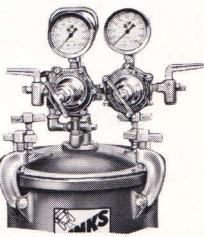

- **Tank shell**, seamless drawn steel, painted on outside.
- **Tank head**, pressed steel, painted on outside, fitted with safety valve, air inlet and air and fluid outlets.
- **Steel band** welded to bottom provides solid support.
- "C" type clamps and wing screws on tank shell, of forged steel. Loosen to remove tank head.
- **Tank easily cleaned.**
- **Maximum working pressure 80 lbs.**

PRESSURE FLUID TANKS

5-Gallon pressure fluid tank
with bottom outlet, less agitator

5-Gallon pressure fluid tank
with top outlet and hand agitator

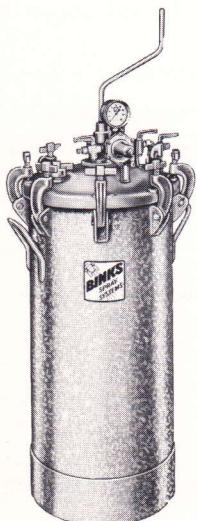

10-Gallon pressure fluid tank
with top outlet and hand agitator

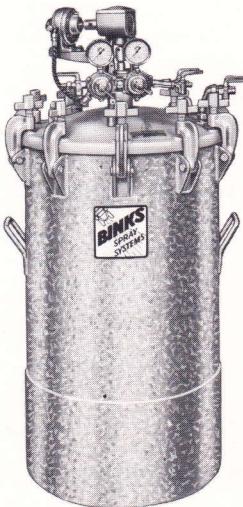

Indispensable where large quantities of fluid are to be sprayed. Fluid is kept under constant, accurate control, assuring uniform high-quality finishes. All tanks constructed in accordance with A.S.M.E. Code and carry certification plate; also carry factory mutual approval.

See page 30 and the pages following for accessories and specifications

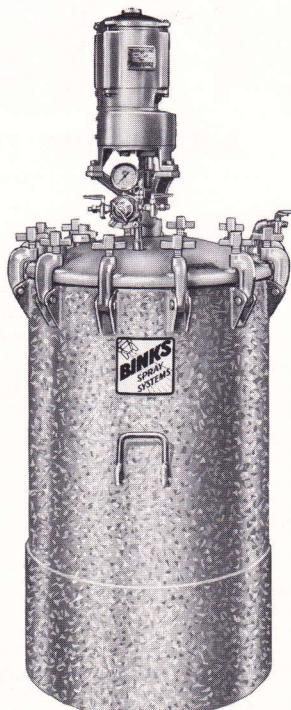

- **Tank shells**, seamless drawn steel, galvanized inside and outside.
- **Tank heads**, pressed steel, cadmium plated.
- **Steel band** welded to bottom assures solid support.
- "C" type clamps on tank shell. Loosen to remove tank head.
- **Tank bottoms concave**, easy to clean.
- **Maximum working pressure 110 lbs.**

SPRAY PAINTING OUTFITS

BINKS CP PORTABLE COMPRESSORS OUTFIT

- These new compressors present an array of features for better performance and lower operating cost which make them completely outstanding.
- These units use no oil! Costly oil extractors in air lines are not needed—no lubrication required. These compressors can be used with full confidence that equipment will not be fouled or work spoiled by oil or oil vapors.
- The CP outfits are particularly handy for maintenance work in large buildings or for hobby use in the home.

Model 34-1001 — 1/4 H.P. Compressor.
Shpg. Wt. 33 lbs.

Model 34-1011 — 1/3 H.P. Compressor.
Shpg. Wt. 42 lbs.

Model 34-1021 — 3/4 H.P. Compressor.
Shpg. Wt. 48 lbs.

CP OUTFIT COMBINATIONS

S-660 PAINTING UNIT

Model 8 gun with quart cup—(J4xR3).
15' H-101 air hose with SC-312 connection one end and SC-315 other end.

Shpg. Wt. 7 lbs.

S-664 PAINTING UNIT

Model 29 gun, (66xR).
81-500 siphon cup.
15' length H-101 air hose with SC-312 connections.

Shpg. Wt. 7 lbs.

S-665 PAINTING UNIT

Model 29 gun (51xR3).
80-215 quart pressure cup.
15' H-101 air hose with SC-312 connections.

Shpg. Wt. 8 lbs.

S-663 PAINTING UNIT

Model 26 gun (78x78SD).
81-500 quart siphon cup.
15' H-101 air hose with SC-312 connections.

Shpg. Wt. 6 lbs.

P-670 PAINTING UNIT

Model 8 gun (J4xR3).
D-5660 two gal. pressure tank less regulator and gauge.
15' H-101 air hose with SC-312 connection one end & SC-315 other end.
15' H-105 air hose with SC-317 connections.
15' H-206 fluid hose with SC-306 connections.

Shpg. Wt. 28 lbs.

P-676 PAINTING UNIT

Model 29 gun (66xR).
D-5661 two gal. pressure tank with regulator and D-1355 gauge.
15' H-101 air hose with SC-312 connections.
15' H-105 air hose with SC-317 connections.
15' H-206 fluid hose with SC-306 connections.

Shpg. Wt. 28 lbs.

P-677 PAINTING UNIT

Model 29 gun (51xR3).
D-5660 two gal. pressure tank less regulator and gauge.
15' H-101 air hose with SC-312 connections.
15' H-105 air hose with SC-317 connections.
15' H-206 fluid hose with SC-306 connections.

Shpg. Wt. 28 lbs.

P-673 PAINTING UNIT

Model 26 gun (78x78SD).
D-5661 two gal. pressure tank with regulator and D-1355 gauge.
15' H-101 air hose with SC-312 connections.
15' H-105 air hose with SC-317 connections.
15' H-206 fluid hose with SC-306 connections.

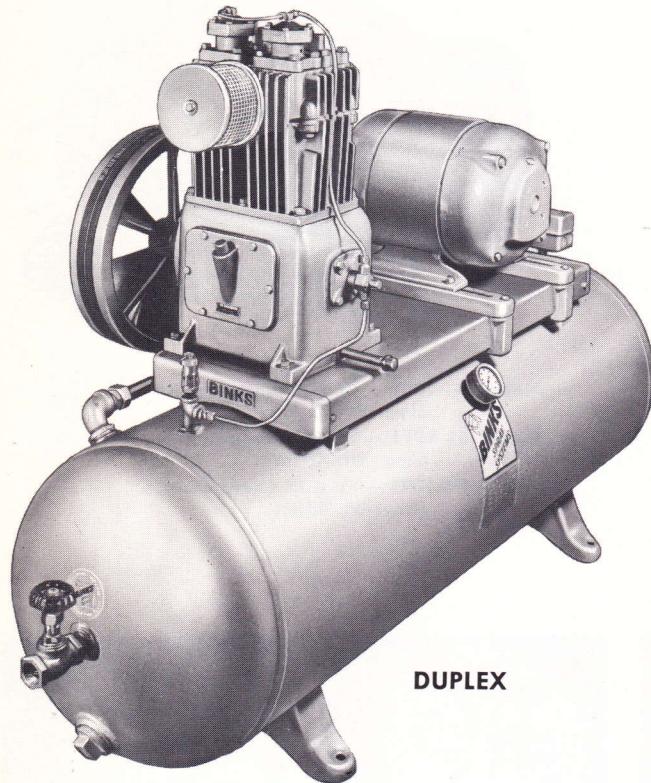

Shpg. Wt. 28 lbs.

BINKS TANK MOUNTED COMPRESSOR UNITS

SINGLE STAGE MODELS

TYPE—Models described in specification table below are single stage two-cylinder and single stage single-cylinder automatic compressor units.

FINISH—Entire compressor unit finished in blue-green metalescent enamel.

TANK—A.S.M.E. specs. Approved by National Board. Designed for 125 lbs. working pressure.

PATENTED UNLOADER—Completely unloads compressor whenever it stops and withholds load from compressor until motor has attained full speed on restart. Eliminates troublesome check valve.

LUBRICATION—Constant oil level type. Pressure lubrication on larger models.

FEATURES—Timken main bearings, lynite connecting rods, automotive type pistons, non-breakable steel valves, totally enclosed dust-proof crankcase, combination intake filter and muffler.

MOTOR—Standard make high quality motor.

OPTIONAL EQUIPMENT—For belt guard to meet safety regulations, and other accessory equipment, see current compressor catalog.

STANDARD EQUIPMENT—Pressure gauge, safety valve, tank drain, shut-off valve and pressure switch.

* Motor protective switch furnished on units 2 H.P. and above.

* Except Pacific Coast Territory and Canada

BINKS TANK MOUNTED COMPRESSOR UNITS

TWO STAGE MODELS

TYPE—Models described in specifications below are two-stage automatic compressor units designed for use where higher pressures are required.

FINISH—Entire compressor unit finished in blue-green metallocene enamel.

TANK—A.S.M.E. specs. Approved by National Board. Designed for 200 lbs. working pressure.

PATENTED UNLOADER—Completely unloads compressor whenever it stops and withholds load from compressor until motor has attained full speed on restart. Eliminates troublesome check valve.

LUBRICATION—Constant oil level type. Pressure lubrication on larger models.

FEATURES—Timken main bearings, lynite connecting rods, automotive type pistons, non-breakable steel valves, totally enclosed dust-proof crankcase, combination intake filter and muffler.

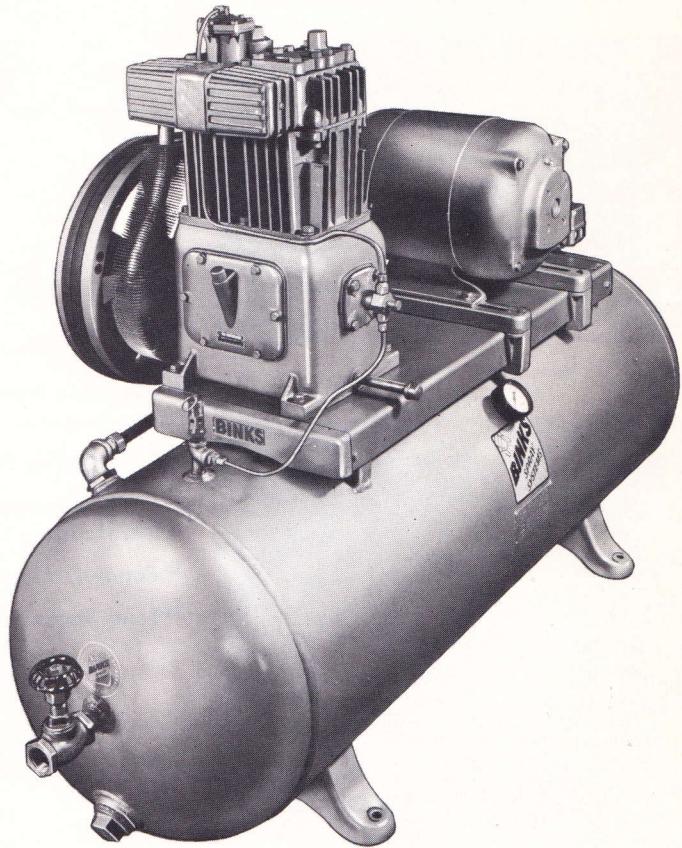

MOTOR—Standard make high quality motor.

OPTIONAL EQUIPMENT—For belt guard to meet safety regulations, and other accessory equipment, see current compressor catalog.

STANDARD EQUIPMENT—Pressure gauge, safety valve, tank drain, shut-off valve and pressure switch.

* Motor protective switch furnished on units 2 H.P. and above.

* Except Pacific Coast Territory and Canada.

FLUID HANDLING PUMPS

TYPICAL INSTALLATIONS

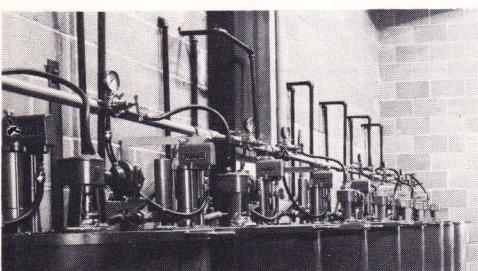

Underbody Coating

Contractors

Railroad and Industrial Maintenance

Circulating Systems

A COMPLETE LINE OF AIR OPERATED FLUID HANDLING PUMPS

FOR

**HEAVY INDUSTRY
LIGHT INDUSTRY
CONTRACTORS**

- Available from a single pump to large installations to meet your requirements.
- For handling fluids from the thinnest to the heaviest.
- Pumps designed on sound engineering principles based on knowledge gained by years of experience.
- Rugged, dependable.
- Long Stroke = Long Life.

TYPICAL APPLICATIONS

Calking—Sealers.
Production Line Finishing.
Corrosion Prevention.
House and Building Painting.
Maintenance Painting.
Roofing (cold process).
Waterproofing.
Glues—Adhesives.
Underbody Coating.
Railroad Cars and Bridges.
Railroad Right of Way Maintenance.
Sound and Thermal Insulation.
Liquid Buffing and Polishing.
Fluid Food Handling.
Paint Circulating Systems.

AUTOMATIC RECIPROCATING MACHINES

BINKS AUTOMATIC RECIPROCATING MACHINE

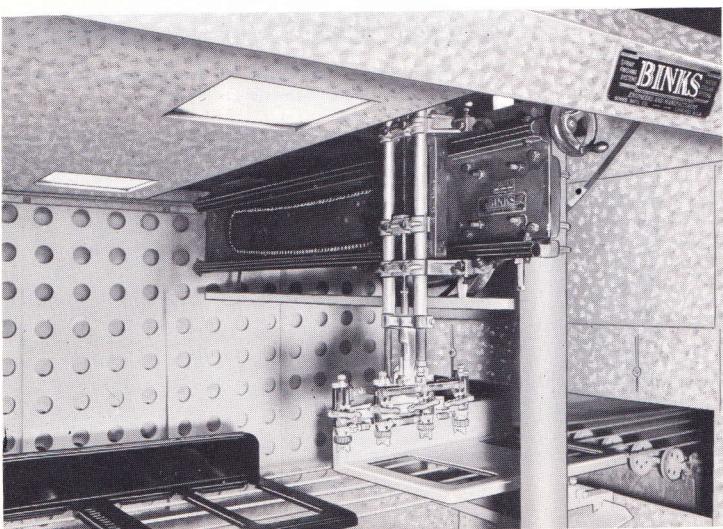

The Binks Automatic Reciprocating Machine is the finest of its kind for painting flat surfaces. This unit produces uniform finishes with practically any type of paint, vitreous enamel, dyes, etc. Binks Automatic Reciprocating Machines are standard production equipment in most of the larger porcelain, textile, building material and metal fabricating industries as well as most tanneries. Quotations on application.

BINKS AUTOMATIC SPINDLE MACHINE

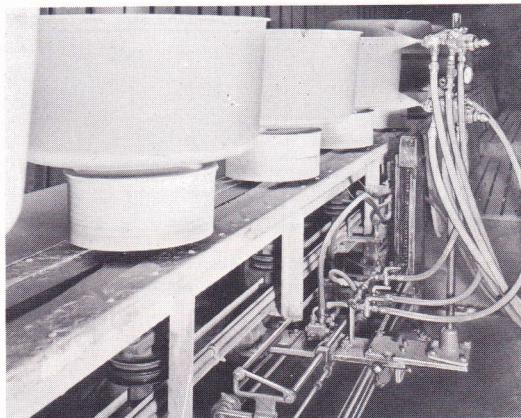

The Binks Automatic Spindle Machine

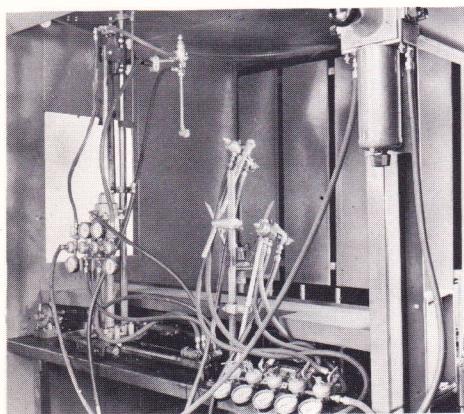

- The Binks Automatic Spindle Machine has proved to be the best automatic unit for fast, economical production painting of products that are generally cylindrical, spherical or disc shaped.
- One decided advantage of the Binks Automatic Machine is that it is designed to permit respacing of the work centers, thereby obtaining the most efficient operation as the size of the work changes.
- Another advantage of the Binks Automatic Machine is that every machine has a skip-spray to prevent spraying unloaded workholders, and that the operation of the skip-spray is not affected by respacing of the work centers. This feature is unique to Binks Automatic Spindle Machines.

BINKS COOLING TOWERS

One of the most complete selections in the entire Cooling Tower Industry.

Binks cooling towers incorporate the most advanced engineering principles and construction features. They include atmospheric, induced and forced draft cooling in a wide range of standard frame sizes for most every business and commercial application. More recently small mechanical draft towers have been developed for residence applications in connection with water cooled air conditioning compressors.

CIRCULATING SYSTEM ACCESSORIES

Model 37-479
fluid filter
Shpg. Wt. 20 lbs.

- Removes foreign matter or solidified pigment particles. Mounted at mixing tank outlet point where fluid is filtered before it is circulated. Can be cleaned without stopping flow by one complete turn of filter handle. Stationary cleaner blades give positive combing action. Filter sump provided with flush-out opening. Cast iron head, welded steel sump, laminated steel cartridge. Pipe connections 1".

Model 84-110
modulating valve
Shpg. Wt. 4 lbs.

- Fully automatic. Required in circulating systems to maintain and balance pressure in fluid lines. All metal construction. Pipe connections 1".

Model 84-103
fluid regulator
Shpg. Wt. 6 lbs.

- Accurately controls fluid pressure to spray gun from circulating systems. Will not clog or strain out pigments. Maintains desired pressure. Equipped with removable key to set pressure of fluid at each spray gun station. Equipped with a by-pass to be used for blowing fluid back out of fluid hose at end of spraying period.

- Also available: Model 84-104 fluid regulator. For low viscosity fluids under low pressure. Principal use is with electrostatic machines.

Model 83-1921
pulsation
elimination gauge
Shpg. Wt. 4 lbs.

- For use with 84-110 back pressure regulator. Constructed so that paint cannot enter gauge. Gauge calibrated to 160 lbs.

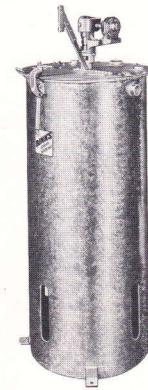

Model 41-701
pulsation chamber
Shpg. Wt. 14 lbs.

- Effectively takes the pulsation out of the paint line which is created by the action of pump as it reverses motion. Pipe connections 1".

Binks MIXING TANKS for paint systems

- Where large quantities of paint are used Binks Mixing Tanks provide a safe efficient method for storage, mixing and distribution. They have stationary mixing baffles within the tank and either electric or air driven agitators. The tank lid is of 1/4" steel and the tank shell of 14 gauge metal. The dished tank shell is a full 17" from the floor. Connections out of and into the tank include: one 1 1/2" drain, three 1 1/2" overflow outlets, one 2" vent, two 1" returns and one 3/8" CO₂ connection in the cover.

Engineering Services

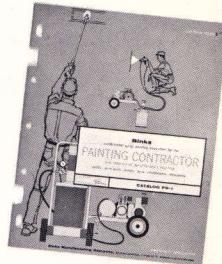

Binks engineers are ready to assist in the design, development and installation of all types of spray finishing or coating equipment and systems. For complete information, contact your nearest Binks office or write direct to the home office in Chicago, Illinois.

Binks catalogs for your reference

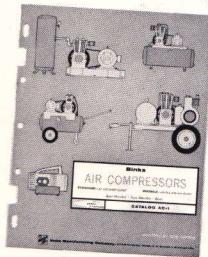

Spray Booths

Catalog SB-1 describes the complete line of spray booths, plus air supply and exhaust systems. Detailed explanations, schematic drawings and complete specifications for quick, easy reference.

Painting and Decorating

Catalog PD-1 describes the complete line of contractor and maintenance equipment, for both airless and conventional spray painting applications. Outfits available for all sizes and types of jobs.

Air Compressors

Bulletin AC-1. Binks offers a complete line of single- and two-stage compressors for every compressed air need. All are engineered for maximum free air delivery and economical operation.

Complete spray painting equipment line

Binks Bulletin 60J-R1 gives a cross section of Binks spray painting equipment line. Discusses air- and airless atomization and electro-static application methods.
